DETAILED ACTION

Claim Objections

Claims 1 and 8 are objected to because of the following informalities. In claim 1 (line 6) and claim 8 (line 6), it appears that "tooth" should be "edge" for clarity.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 5 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 2 of claims 5 and 12, it appears that "inwardly" should be "outwardly" to be consistent with Figure 4 wherein the cutting edge 22 of a tooth is shown extending outwardly from cutting face 18. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 8-11, 13, 15-16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Da Rold (US 5,968,049).

Da Rold discloses a milling cutter for medical purposes having a milling body 2 in the form of a hemisphere, for e.g. in the case of an acetabulum cutter; and a plurality of cutting teeth 10, wherein each tooth 10 has a cutting tongue or "edge" 13 at an angle Art Unit: 3732

about an axis through base end 14 and a clearance opening (Figures 3-6, col. 2, lines 48-67, col. 3 and col. 4, lines 1-27).

Page 3

Regarding claims 1-3, 6, 8-11 and 13, Da Rold discloses a method of mechanical production of a milling cutter including cutting a plurality of openings 10 in a milling body (in the form of a hemisphere in the case of an acetabulum cutter), wherein each opening defines a cutting tongue or "edge" 13 of a tooth and bending a cutting tongue or "edge" 13 of each tooth (col. 3, lines 13-29).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5, 7, 12, 14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Da Rold (US 5,968,049).

Da Rold discloses the claimed invention except for the claimed shapes.

It would have been an obvious matter of design choice to one skilled in the art at the time the invention was made to have constructed the milling cutter 2 with a concave-shaped cutting face and the clearance opening as a semi-circular opening, since applicant has not disclosed that these shapes solve any stated problem or are anything more than one of numerous shapes or configurations a person ordinary skill in the art would find obvious for the purpose of providing a cutting face of a cutter. In re Dailey and Eilers, 149 USPQ 47 (1966).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
